3 days with Hypack, Norbit and GBT Offshore

Thanks to Hypack, Norbit, University of Malta and GBT Offshore a very interesting 3 days course on Multibeam and Laser Scanner was carried out in Malta from 26th to 28th of September 2016.

3 days with Hypack, Norbit and GBT Offshore

Norbit and GBT Offshore were in Malta a few days before to take care of the Multibeam shipping, custom documents and vessel mobilization.

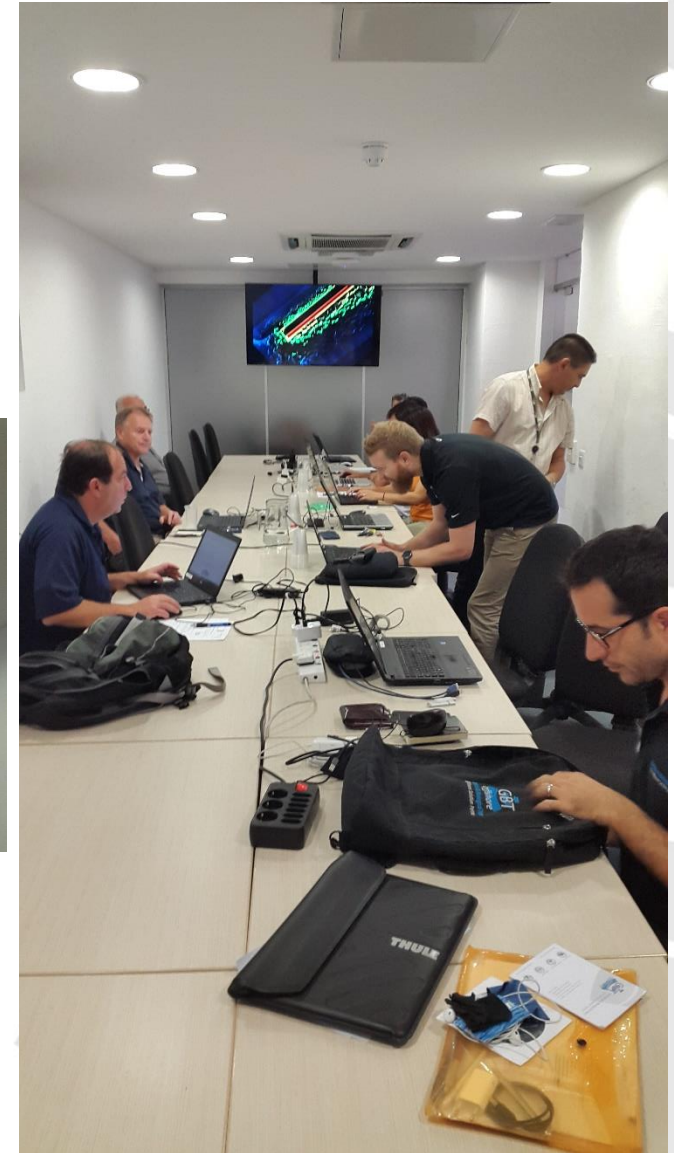

3 days with Hypack, Norbit and GBT Offshore

Installation of the Multibeam was very easy and fast thanks to the small dimensions and portability of the Norbit system.

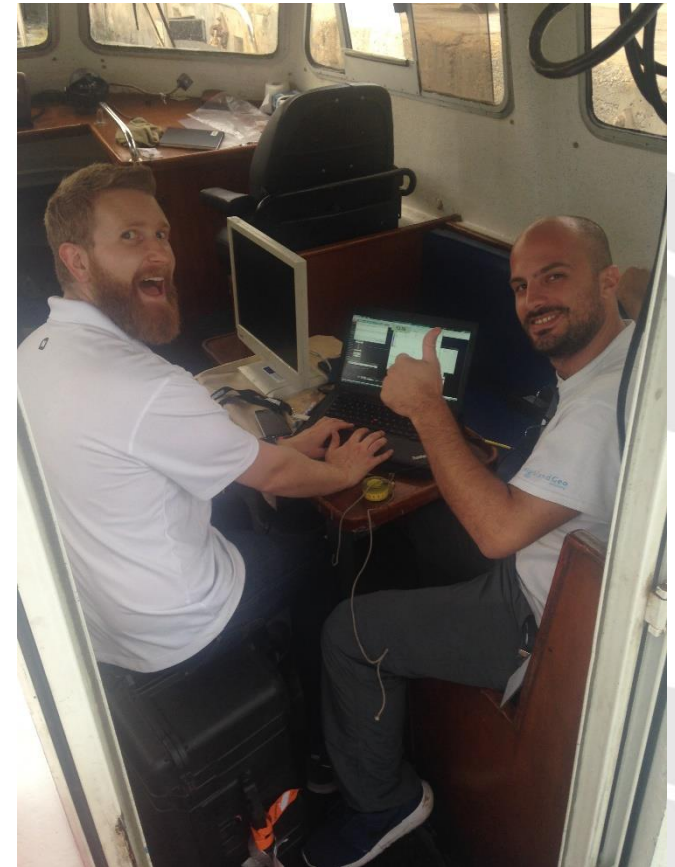

3 days with Hypack, Norbit and GBT Offshore

Hypack and GBT held the course at the University of Malta, many topics were discussed, from Multibeam Theory of Operations to the Multibeam Processing and Exporting, going through the Interfacing and the Acquisition of Multibeam data.

Interfacing Hypack and Norbit

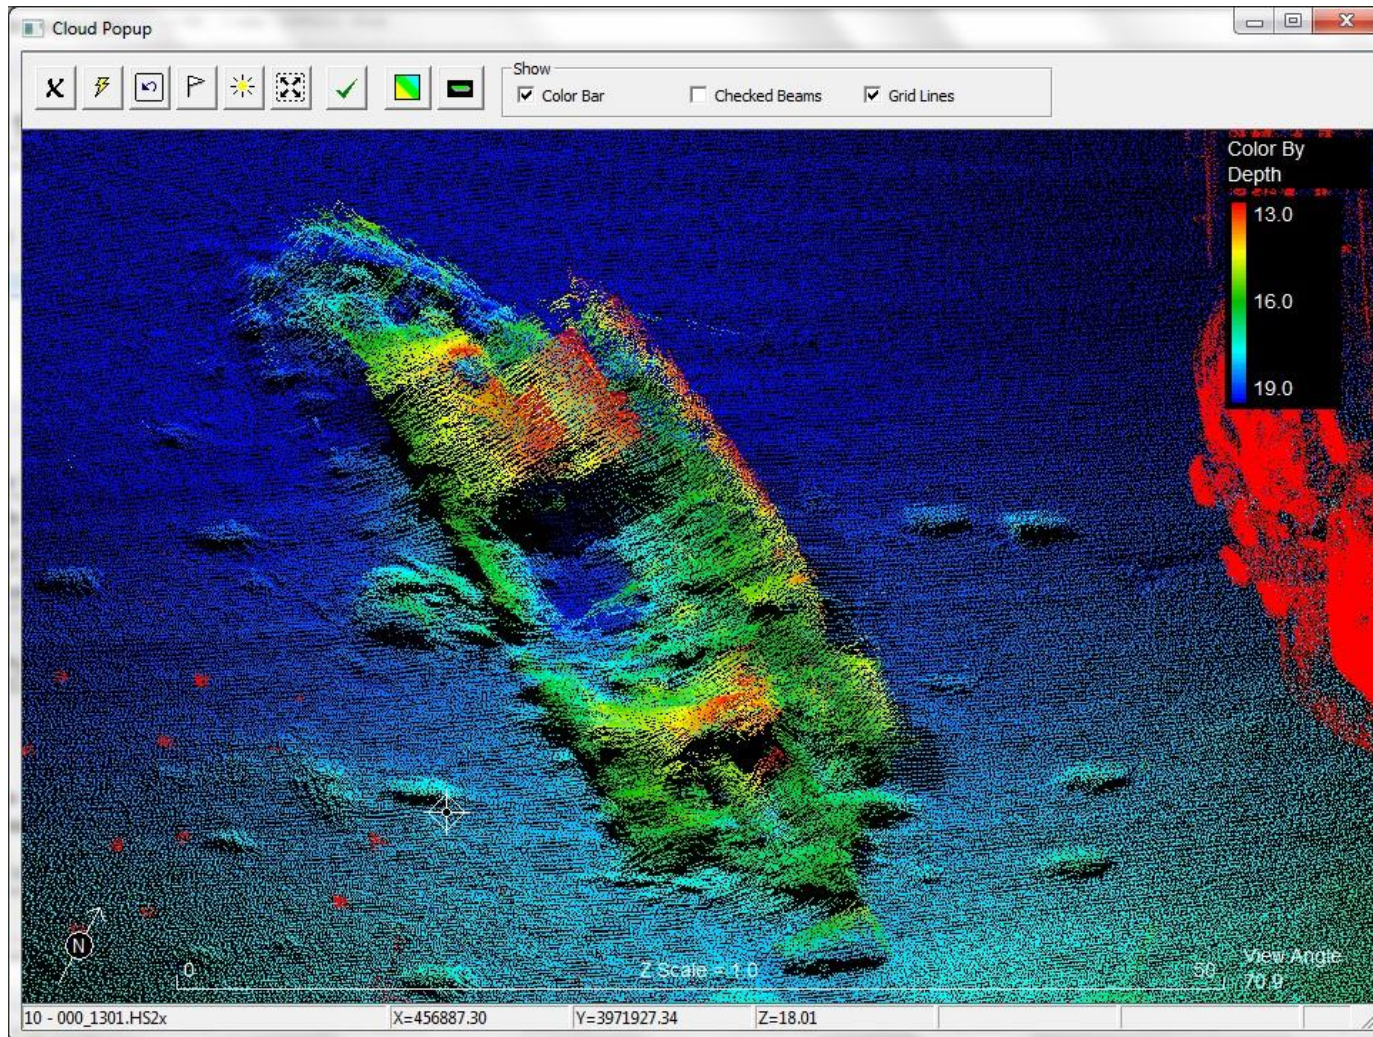

3 days with Hypack, Norbit and GBT Offshore

Valletta Harbour is a great place for data collection because of the known presence of a wreck and semi-submerged structures, like a Jack-Up. This is the ideal scenario to collect Multibeam and Laser Scanner data.

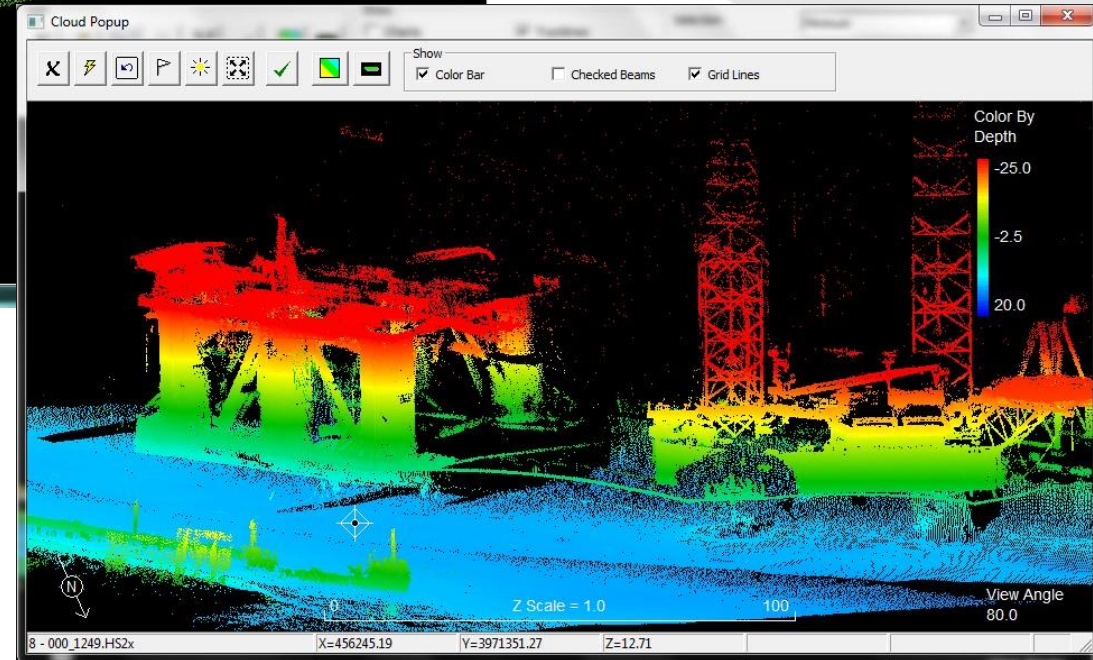

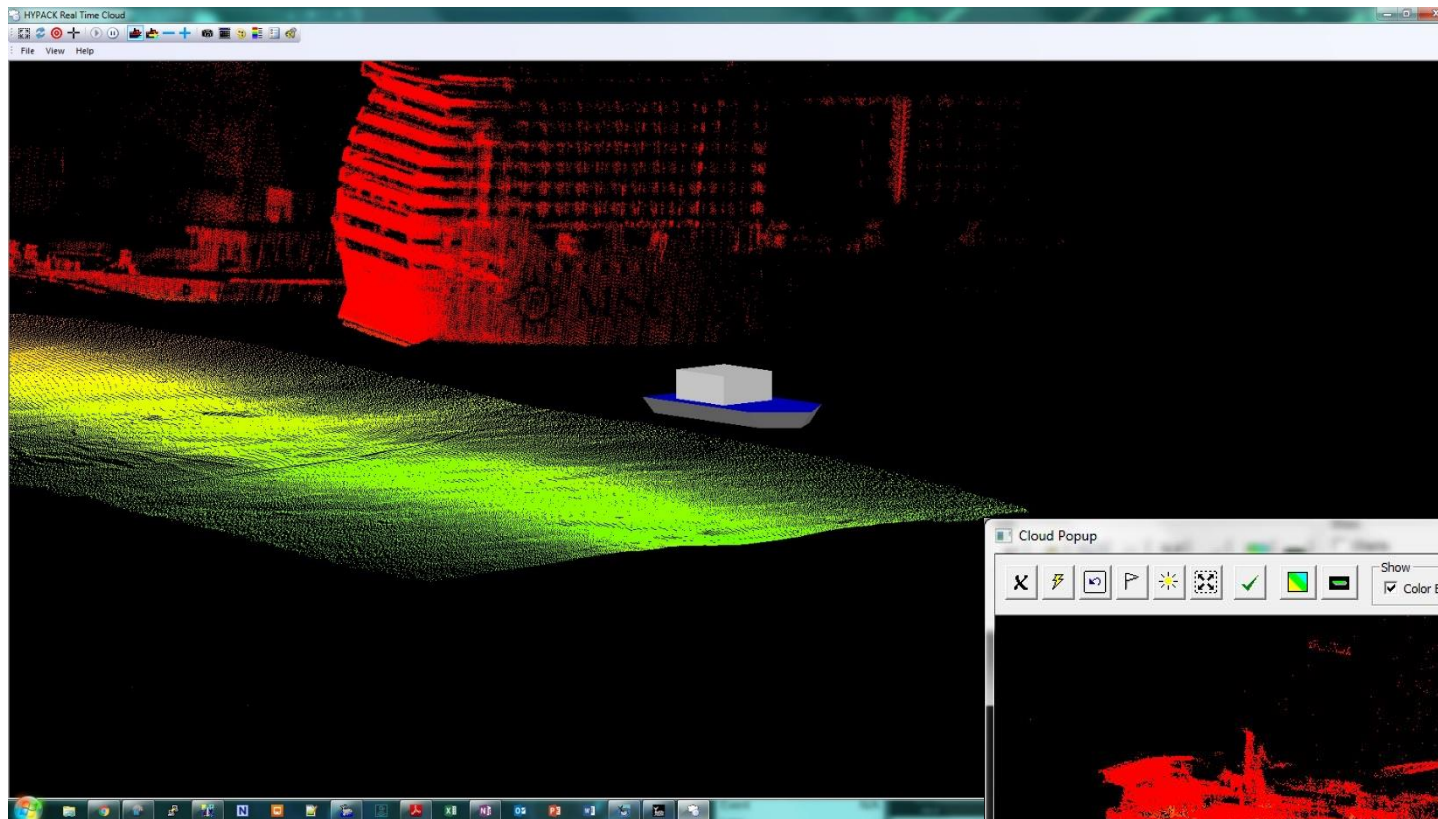

3 days with Hypack, Norbit and GBT Offshore

...and the result was great!
