

#### POWERFUL SURVEILLANCE AND DETECTION OF UNDERWATER INTRUDERS.

One single GuardPoint100 sonar head offers a surveillance range of up to 750m, designed to Detect, Track, Classify and Monitor response to modern underwater intruder threats. Designed to function optimally in shallow water and challenging environmental conditions, the GuardPoint100 system remains an easy to use system for surveillance non experienced personnel or expert sonar operators alike. Through the networking of multiple sonar heads extended coverage can be achieved, providing a robust and reliable solution for the most complex of surveillance tasks.
